

Michaël Laporte

Operations Research student

Freshly graduated from ENPC (École Nationale des Ponts et Chaussées) with a master's degree in operations research from MPRO (Master Parisien de Recherche Opérationnelle). I am currently seeking an opportunity in the academic field to pursue a PhD in operations research.

Qualifications

- Driver's license
- Bilingual in English (905 TOEIC pts)
- Proficient in multiple programming languages (Python, C++, R, CPLEX, Ampl, HTML and CSS)

Activities/Hobbies

- Sea rowing, participation in the French championship in Menton in 2016
- Rugby, with the École des Ponts club
- Programming and mathematics, participation in several challenges, general competitions, and the IMO (International Mathematical Olympiad)
- Amateur rock climbing while in high school
- Active member of Le Foyer des Ponts, École des Ponts' student events organization

Professional experience

- **April 2025 - October 2025**
6-month internship at UM6P

Research

I was part of a research project in collaboration with OCP Group. The project focuses on optimizing OCP's fertilizer supply chain distribution network and developing a comprehensive decision-support tool to enhance their logistics operations.

- **February 2024 - July 2024**
6-month internship at Exail

Research & Development

I was part of the R&D team working on a project to improve the detection quality of the Automatic Underwater Vehicle (AUV) manufactured by Exail. During this stage I worked with numerous industrial solver such as Gurobi, Knitro and OR-Tools, meanwhile I also helped to improve the modelisation of the vehicle routing.

- **June 2023 - January 2024**
6-month internship at Louis Vuitton

International logistic

I was part of a multi-company project launched by the École des Ponts supply chain chair. The project aimed to anticipate the "warehouse of the future" by pooling various innovations in the field of logistics.

Scientific projects

- **Photo Inpainting using Image Processing**
<https://github.com/micagent007/projet-intpainting.git>

- **Participation in Kiro**

Kiro is an optimization competition hosted by École des Ponts and sponsored by a different company each year

- **3D Mesh Generation for Medical Purposes**

Second-year project in collaboration with Gense Tech, a Hong Kong-based company combining AI and medicine

Education

- **Master degree (Operations Research)**
Master 2 Parisien de Recherche Opérationnelle (MPRO), CNAM Paris (2025)
- **Engineering degree (Optimization and Computer Science)**
École nationale des ponts et chaussées, Paris (2021 - 2025)
- **Bachelor degree (preparatory class in Maths and Physics)**
Lycée Pierre-de-Fermat, Toulouse (2019 - 2021)
- **High school diploma in sciences (with honors)**
Lycée militaire, Aix-en-Provence (2016 - 2019)
